LTWS-1 Lift Truck Weigh System Data Sheet

Standard American Forklift Scale Indicator

General Features

Most user friendly system available with built-in diagnostics and our toll-free unlimited telephone technical support line.

The LTWS-1 system is designed to work in the harshest environments dependably and accurately.

Accurate and requires on average only 2 -3 hours for installation

Buy Now With Our No Fault 21 Day Test Drive Program.

The ACCUMULATE feature allows operators to monitor total weights during loading or unloading tasks.

The LTWS-1 and LTWS-1SS are identical except for the housing. Each share the American Forklift Scale proprietary operating firmware developed for deriving accurate weights from hydraulic lift and holding pressures.

Technical:

Input Power: Voltage: 9 to 18 Volts DC

Nominal: 100 mA plus 30mA per transducer Maximum 500 mA

Excitation: 5 Vdc (Maximum Four (4) transducers Transducers)

Transducer: Stainless steel, temperature compensated circuitry.

Operating Temperature: 14F to 122F (-10C TO 40C)

Display Technology: 6 digit LCD, 0.8" high

Control Key Functions: Units/Power, ZERO, TARE, SELECT, PRINT, OK(f)

Set Points: Two (2)

Serial Port: Full Duplex RS232 protocol

Housing:

Dimensions (Less mounting bracket): 6.5" (164mm) X 3" (76 mm) X 3.4" (86 mm)
